

Dr. Mark Baker, MD, FACS

Now offering
Da Vinci *Single Port (SP)* Robotic Surgery

- Leading TransVesical Single Port Surgeon, serving Florida for 20+ years
- Performed:
 - ✓ First ever **TransVesical Radical Prostatectomy** in the state of Florida!
 - ✓ Most SP urology procedures in the Tampa Bay area
 - ✓ Over 1200 Robotic Surgeries and over 200 Single Port (SP) Robotic Surgeries
 - ✓ Over 100 SP Radical Prostatectomy Cases

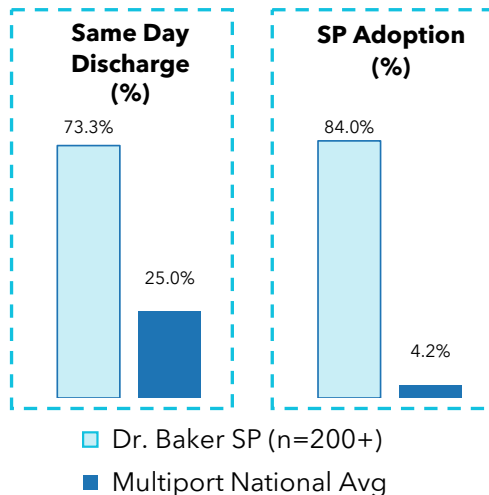

ROBOTIC EXPERIENCE

N = 1200+

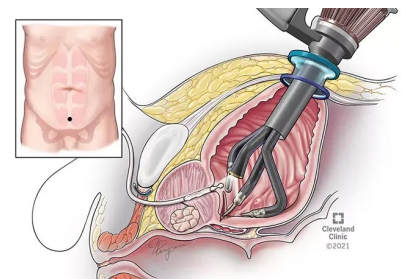

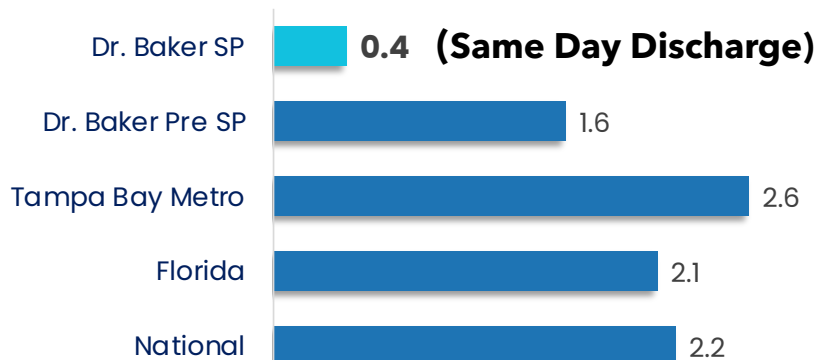

SP Prostatectomy Outcomes that matter:

- **53% Immediate Continence** (liner or less per day) after foley removal.
- **92% Continence at 3 months**
- **86% Negative margin rate** over the last 50 Cancer Cases. National average is 75%. (all margins <3mm – “clinically low risk” for recurrence)
 - Only 1 patient to date has required Salvage Radiation therapy

Average Multiport prostatectomy length of stay (days)

DRG 665, 666, 667**

Call (813) 356-0196 to schedule an appointment with Dr. Baker!

- ❖ ***Dr. Baker is a leading innovator in the state having done the first ever Trans-Vesical SP Radical Prostatectomy in the state of Florida!***

Single Port Surgery Benefits:

- ❖ **Regionalized Surgery (Trans-Vesical, Pre-Peritoneal, or Retroperitoneal). Surgery that remains outside of the abdominal Cavity.**
- ❖ **Single incision 2-3cm. Less pain and Superior Cosmesis.**
- ❖ The ability to stay outside of the abdomen leads to less risk of injury to other organs and vessels, preserves natural anatomy, & helps avoid intraperitoneal complications
- ❖ **Same Day Surgery Discharge achievable due to less pain, less narcotic requirements, and ultimately less postoperative complications**
- ❖ ***Dr. Baker uses the most advanced robotic technology, Da Vinci SP, to provide superior patient outcomes and allow decreased risk of pain, faster return to work, and superior***
